

Victoria Rumens

Coming from a professional background in legal services and having worked for over 10 years in law I felt the need to change my career path.

I listened to my intuition and discovered a passion for architecture and design. Interior design has always played a big part in my life but I was mostly on the outside of the process.

Whilst participating in this class I've learned new skills like drawing to scale on a drawing board and putting together samples for a design board. Working with new textures and materials in the workshop and the guidance of our inspiring tutor Debbie has given me a totally new understanding of what interior design can achieve. It's more than just decorating a room; it can spark happiness, satisfaction and balance in your life.

I feel very grateful to be part of this course, which is exactly what I was looking for. After this course I will definitely continue to learn about interior design and will become a professional in this industry.
